

WE'VE GOT YOU COVERED

Protect yourself, protect your community.

As a public health measure, the CDC recommends the use of cloth coverings for your protection. These ultra-soft lightweight 4.4oz. cotton/poly spandex masks provide extra stretch and comfort. The machine cut edge design is produced with minimal human touch. The one-size fits all mask has 2 adjustable ear holes to fit different face sizes and shapes. These single ply face masks are not certified for medical use, but are washable and reusable and recommended to be replaced after 2-3 washings.
